Microsoft Certified: Azure Data Fundamentals
Power Searching with Google
Microsoft Certified: Azure Fundamentals
MCPS: Microsoft Certified Professional
MS: Implementing Microsoft Azure Infrastructure Solutions

Honors-Awards

Gold Medal in MCA

Devendra Solanki

Team lead | AI Architecture & Innovation Lead | Shipped AI Agents That Cut Delivery from Months to Days | GitHub Copilot & Cursor · Microsoft Certified

Gandhinagar, Gujarat, India

Summary

Most engineering teams don't have a system problem. They have a speed problem — the right architecture takes too long to design, the right code takes too long to review, and the right workflows take too long to build. I'm Devendra — a team lead and AI Agent Developer with 14+ years at Cybage Software. I design scalable backend systems and build AI-powered tools that get teams moving faster. Recently, I've gone deep on GitHub Copilot and agentic AI — shipping 2 production AI agents that automated internal workflows and accelerated developer productivity, cutting turnaround time from months to days. My core areas of focus:

- .NET architecture — design, implementation, and long-term maintainability
- Migrations, upgrades, integrations, and scalable infrastructure
- AI agent development — process automation and developer productivity tooling
- GitHub Copilot adoption — hands-on experience accelerating engineering teams
- Technical direction — bridging business requirements and engineering execution

I'm a Microsoft Certified Professional (Azure Fundamentals, Azure Data Fundamentals) and Gold Medallist in MCA. More importantly, I've spent 13 years understanding both the code and the architecture above it — which means I design systems that engineers can actually build and maintain.

Experience

Cybage Software

11 years 8 months

Senior System Analyst

May 2025 - Present (1 year 5 months)

Gandhinagar

Architected a zero-miss monthly release cadence for an enterprise HCM platform by owning end-to-end technical direction across system design, code

review, and deployment — sustaining 40+ production releases over 3+ years without a missed cycle.

AI Achievement: Designed and shipped 2 production AI agents using GitHub Copilot — one automating internal HCM workflows, one accelerating developer productivity — cutting delivery turnaround from months to days.

Scaled and led a cross-functional engineering team of up to 13 developers by establishing technical standards, conducting structured code reviews, and mentoring mid-level engineers — improving team collaboration, velocity and reducing rework across release cycles.

After educating myself on improving understanding around AI and prompt engineering, mentored the team to increase the effective usage, it resulted in achieving 13% more deliverables than before.

System Analyst

April 2021 - May 2025 (4 years 2 months)

Gandhinagar

Established a reliable monthly release pipeline for a large-scale HCM product by designing scalable .NET and coordinating cross-team delivery — laying the foundation for 3+ years of uninterrupted production releases.

Reduced system integration risk on critical HCM modules by leading architectural reviews — enabling faster engineer onboarding and cutting dependency on tribal knowledge.

Placed efforts to enhanced understanding and hands-on experience with AI & prompt engineering

Senior Software Engineer

April 2017 - March 2021 (4 years)

Gandhi Nagar, Gujarat, India

Built backup, migration, archival features and scanning the content of the documents across a multi-cloud storage platform by developing .NET/C#, Angular based solutions integrating with different cloud storage providers (like Box, Amazon S3 etc) — enabling enterprise clients to move and protect content seamlessly across cloud providers.

Contributed to faster, more accurate project planning by actively participating in requirement estimation and sprint planning sessions alongside architects

and leads — bridging the gap between technical complexity and delivery timelines.

Software Engineer

February 2015 - March 2017 (2 years 2 months)

Pune, Maharashtra, India

Worked on two different domains during this tenure:

1. Travel & Hospitality:

Worked on an application, which can be used internally by Hotel staff to register / search the guest information

2. Technology

Joined another team where different cloud storage providers were about to be integrated.

Prakash Software Solutions Pvt. Ltd

2 years 6 months

Software Engineer L2

April 2014 - January 2015 (10 months)

Vadodara, Gujarat

- Design and Development
- Maintenance and Documentation
- Requirement Estimation
- Delivery and Deployment

Software Engineer

April 2013 - March 2014 (1 year)

Baroda

Designing and Developing Web applications

Administration and Customization of MS Dynamics CRM 2011

Junior Software Developer

August 2012 - March 2013 (8 months)

Designing & Developing Web application

Lead management in MS Dynamics CRM 2011

VKWARE Software Technology Pvt. Ltd., Mumbai

Project Trainee

February 2012 - May 2012 (4 months)

I worked on Education Cloud ERP.

Education

G. H. Patel P. G. Department of Computer Science, Sardar Patel University

MCA, Computer Science · (2009 - 2012)

Shri H.J. Doshi IT Institute

Bachelor of Computer Application, Computer and Information Sciences, General · (2006 - 2009)
